Cost Category wood studs (104) clear

WCI Class * carpenter (4)

Certified Class * carpenter (4)

Notes
Great progress today

JOBPOWER Mobile allows payroll hours and tasks to be entered in the field, then imported into JOBPOWER Payroll quickly, accurately and efficiently. Either field employees or supervisors can enter hours, days

worked, jobs, cost category codes, work classes and pay types while on the job site, eliminating the need for an office employee to enter the data.

Alternatively, they can clock-in, pick the job, cost category, work class and then clock-out when switching tasks or finished for the day. When you are ready to process Payroll, just import the hours, jobs, etc. to facilitate quicker and more accurate payroll processing.
